- Cooler

General informations

The scout GSM is an inexpensive and easy solution for the supervision of movable objects like boats, yachts, caravans or campers as well as the supervising of homes. Over connected sensors the device grasps, e.g., burglaries, upcoming fire, water or other serious events. These are immediately sent by SMS to any mobile phone and the user is able to initiate immediately countermeasures. The system is simply configurable about the phone number memory of the SIM-card and is ready for use immediately.

Further it is possible to activate the relais outputs by an SMS. So the user is able to switch different devices on board on or off. Bz GPS is it possible to localise the position of the GSM Scout and the supervised object. The position will be send as an SMS.

Technical specific features

- Comfortable connection about screw contacts
- No special software necessary
- The easy configuration about SIM-card
- Small construction style
- 2 relais contacts for switching devices
- Customizable event messages
- GPS positioning via SMS

Conditions

To use the scout GSM, you need:
Power supply, activated SIM-card (prepaid or fix contract), Sensors

Technical data

GSM networks	900 & 1800 Mhz or 850 & 1900 Mhz networks
Configuration	Programming of the SIM-card over the mobile phone
Physical Dimensions / weight	100 x 90 x 25 mm (L x H x W) / 140 g
Temperature range	- 30 °C bis + 60 °C work temperatur
Interfaces	1 registration circle for "burglary" 1 registration circle for "fire" 1 registration circle for "water" 1 registration circle for "arbitrary event" 2 relais contacts
Energy supply	11 - 35 V DC , 90 mA

Scope of supply	GSM Scout GPS Manual Miniatur screw driver
