- Heatings, reefers and server rooms
- Buildings and objects
- Plants and machines
- Boats, yachts, campers and caravans
- Home

Remote switching of:

- Bilge pump
- Light
- Air conditioner

General information

The GSM Scout Professional is a professional solution for monitoring objects. The device detects e.g. Burglary, upcoming fire, entrance of water, or other fundamental incidents, with its connected sensors. Those are sent immediately by SMS to a choosable cell phone, which allows direct reaction. The system is easy to customize with the dial number storage of the SIM card and instant ready to use. Furthermore it is possible to activate the relais output by SMS. That makes switching on or off possible, for a huge number of devices. An optional extension is the tracking by SMS. The GSM Scout Professional is able to detect its position and sending an SMS, in the case of unauthorized movements.

Technical features

- Easy installation with screws
- No special software required
- Easy setting bei SIM card
- Transmitting of credits for prepaid SIM card
- Transmitting of the signal quality
